THE SOUNDS OF RHYTHM

The Sounds of Rhythm are known for their street corner symphony and smooth Doo-Wop sound. They have triumphantly embraced this musical style that was born simultaneously with Rock and Roll. They are sustaining the tradition of this great American song style.

Kenny Miles, Carl Dedrick, Larry Beauchamp and Wayne Campbell all experienced the appeal of music at a young age. Their individual musical experiences, inspirations, ambitions and creativity have been united to create the inspiring, soulful, melodic sounds of what is undeniably the sounds of rhythm.

These impressive vocalists have performed with great artists such as *Jon Hendricks* and *Lenny Williams*, and their great musical talents have been on display at many festivals and venues. They are an impressive music phenomena that reveal an extraordinary ability to mesmerize, uplift and captivate all.

When performing, these exceptionally talented artists are at their finest. In their own words: *"This is a dream came true"; "We experience a certain type of energy - we feed off the response we receive from the audience, we feed off of their energy"; "We're on a mission, to touch people with a song, it's a way to communicate, we feel we get a lot more from the audience than we give"*
